EXPO SCÈNE 2027

PRESS RELEASE – NOVEMBER 2026

EXPO-SCÈNE 2027: Save the Date for Canada's Leading Entertainment Technology Show

April 7–8, 2027 | Palais des congrès de Montréal

Two Days of Innovation, Connection and Discovery

EXPO-SCÈNE returns to Montréal on April 7–8, 2027, bringing together the people, technologies and ideas shaping the future of live entertainment. Produced by the Canadian Institute for Theatre Technology (CITT/ICTS), this annual gathering is Canada's only trade show dedicated to stage, audiovisual and event technologies, welcoming professionals from across North America and beyond.

Each year, technicians, designers, integrators, technical directors, buyers, students and other industry professionals come together to discover the latest innovations, explore new solutions and connect with leading manufacturers and suppliers. Representing sectors such as theatre, concerts, touring, festivals, audiovisual integration and live events, attendees share a common interest in the technologies and expertise that bring experiences to life.

More than a showcase for the latest equipment, EXPO-SCÈNE is valued for its welcoming atmosphere, meaningful conversations and opportunities to build lasting professional relationships. It is where established industry leaders meet emerging talent, new ideas take shape and the Canadian entertainment technology sector comes together.

Discover the Latest Technologies and Learn from Industry Experts

Building on the strong turn-out of the previous edition, EXPO-SCÈNE 2027 promises another exciting opportunity to discover the latest innovations, connect with industry leaders and explore emerging technologies. From professional audio, lighting, video, staging, rigging, special effects, systems integration and AV solutions, the show will bring together the products, expertise and people shaping the future of entertainment technology.

Visitors can anticipate fresh discoveries, valuable connections, and the welcoming atmosphere that makes EXPO-SCÈNE an essential event for the industry.

Beyond the trade show floor, EXPO-SCÈNE offers a range of opportunities to learn, explore and develop new skills. Visitors can experience selected technologies up close in

the Demo Rooms, gain insights from exhibitors through the TEC Talks educational series and take part in hands-on Pro Training sessions designed to expand their knowledge and skills using the latest industry equipment.

Free visitor registration is open – Register today for your free access to both days of EXPO-SCÈNE 2027, including the trade show floor, TEC Talks and Demo Rooms. Additional fees apply to training sessions.

For visitor registration and event updates, visit citt.org/ExpoScene.html.

About CITT/ICTS

The Canadian Institute for Theatre Technology / Institut canadien des technologies scénographiques (CITT/ICTS) is a national arts service organization that promotes the professional development of its members and the betterment of the Canadian live performance community. https://www.citt.org/
